### Most important facts about Ambien.

It's known that the consumption of Ambien may result in a severe allergic reaction. Stop taking it and seek for emergency medical attention if you experience some of the following symptoms: hives; difficulty breathing; swelling of your face, lips, tongue, or throat. Ambien makes you sleepy, so we strongly suggest you not take it unless you have 7-8 hours that you can dedicate to sleep.

There have been several cases of unconscious involvement into activities such as driving, eating, making phone calls and talking among patients using Ambien. If something like that ever happens to you, cut using Ambien and discuss an alternative way to treat your sleeping disorder with your therapist. The consumption of Ambien may affect your thinking and your reactions. You may still feel sleepy even after 7-8 hours of sleep triggered by Ambien. Be careful with Ambien if you are planning to do anything that may require you to be awake and alert.
