

KnujOn Police Box

**The Jurisdictional Cybercrime
Reverse-Lookup Service for Law
Enforcement**

KnujOn.com's Police Box interface is a tool designed for local law enforcement that presents investigators with information about illicit Internet activities occurring within their communities. KnujOn.com collects legal public data on online rogue pharmacies, fake lending institutions, software piracy sites, knockoff consumer goods traffic, spam campaigns, and complex financial scams for straightforward delivery to the concerned authority. Rather than starting with a website or IP address, KnujOn Police Box presents lists of criminal networks by municipality, county, state and nation.

Cybercrime may span the globe but organized criminal groups are often anchored in certain locations and typically rely on specific service providers. KnujOn Police Box will alert you when this happens in your jurisdiction.

Features:

- Police Agency Subscription Service by Jurisdiction
- Searchable Database by Zip Code, Municipality, County, State, and Nation
- Case-Building Interface With Time-Stamped Records, Image Samples, Source Code, and other vitals
- Custom Report Development and Consultation

KnujOn.com, LLC

For more information: <http://www.knujon.com/policebox>

The simple query interface presents investigators with pre-sorted information on illicit Internet activity connected to their location. KnujOn is only a click away to assist with research if needed. This tool is designed to give law enforcement access to our data without overload.
