[The sport of bodybuilding](#)

The sport of bodybuilding The popular, growing sport of bodybuilding in the region is leading to bigger championships for local enthusiasts. Dana Ali, 31, who recently returned to Kurdistan from Britain, started lifting weights six year ago when he was abroad. "Oh, I became many pounds overweight," he said, taking a break after finishing the first set. "I see so many [overweight people] here, and I don't want to be like them. "I feel better and forget about all my problems when I come in and exercise," said Ali, having arrived straight from work wearing a black T-shirt and leather gloves. He works out five times a week and has shed most of his body fat; his chest and biceps are as thick as they were when he was living in Britain.

[Women On Prudent Dietary Pattern May Reduce Risk Of](#)

Substance: Drostanolone Enanthate and Propionate
Manufactured by: Axiolabs
Packaging: 1 x 10 ml (200mg/ml)

Mastaplex 200 (Drostanolone Enanthate and Propionate) is a synthetic derivative of **dihydrotestosterone**, displaying a potent **androgenic effect** that is responsible for increases in muscle density and hardness and a moderate anabolic effect that creates a positive nitrogen balance in humans and promotes protein synthesis. Since it is a derivative of **dihydrotestosterone**, dromastolone does not aromatize in any dosage and thus it cannot be converted into estrogen. Therefore, estrogen-related water retention is eliminated. **Mastaplex 200(Drostanolone Enanthate and Propionate)** combines the fast-acting propionate form with the longer acting **enanthate** form.

Drostanolone (trade name *Masteron*) is an **anabolic/androgenic steroid**. It is known to be highly androgenic and mildly anabolic. It is incapable of aromatization and has similar properties to dihydrotestosterone. It has been successfully used as a breast cancer drug but because of the high risk of virilization safer options are prescribed.

Use in sports

Masteron is used primarily by athletes who need to retain strength while losing **mass**. It is beneficial to runners and athletes who must remain in a certain weight class. It has gained popularity in the **bodybuilding** community as a diuretic and muscle defining drug.

Trivia

Ultimate Fighting Championship athlete Hermes Franca tested positive for use of **Drostanolone** following his July 7th 2007 lightweight championship bout against title holder Sean Sherk.

Death

Women On Prudent Dietary Pattern May Reduce Risk Of Death Women who eat a diet rich in vegetables, fruits, legumes, whole grains, fish and poultry may reduce their risk of death from cardiovascular disease and all causes. Women who follow a traditional "Western" diet of red and processed meat, refined grains, fries and sweets may increase their risk. That's the conclusion of researchers who reported the results of a Harvard School of Public Health study in Circulation: Journal of the American Heart Association. The study of 72,113 healthy women found that high adherence to the "prudent" dietary pattern was associated with a 28 percent lower risk of death from cardiovascular disease and a 17 percent lower risk of premature death from all causes when compared to the lowest adherence.
